Curriculum vitae

Creative and driven biologist & nature enthusiast

I am a Master's student in microbiology, focusing mainly on fungi. In my spare time, I explore their potential in creating more sustainable food systems, whereas my research is focused on using molecular methods to discover hidden mould in buildings. Apart from that, I love taking pictures and getting lost in deep thought on the nature of reality.

current main occupation

R

Student Assistant, Indoor Climate Lab

Rambøll Danmark A/S · since 2025

KU

MSc in Ecology

Copenhagen University · 2025–2026

grants won

6

152,125 DKK in total

species recorded

303

live from the field log

Education

2025–2026

KU

Master of Science in Ecology (GPA: 3.8)

Department of Biology, Copenhagen University, Denmark

2025

KU

PhD Course in Geometric Morphometrics in R

PhD School of Science, Copenhagen University, Denmark

2021–2025

KU

Bachelor of Science in Biology (GPA: 3.1)

Department of Biology, Copenhagen University, Denmark

Work Experience & Volunteering

WORK

2025–NOW

R

Student Assistant, Indoor Climate Lab

Rambøll Danmark A/S · working with analysis of mould, tree-degrading fungi, and fungal toxicity

2025

KU

Student assistant, MSc course “Field Mycology and Identification of Fungi”

with leading experts Jacob Heilmann-Clausen and Thomas Læssøe

2024–NOW

FLOR DN

Guided mushroom tours for FLOR

Danmarks Naturfredningsforening · mycology tutoring, photography, and fungal breeding

EARLIER

Several non-biology positions

Prior to a career shift, I worked as a full-time boarding school teacher, part-time freelance acrobatics teacher, and a circus arts school board member. My main work was establishing inclusive movement-based communities.

VOLUNTEERING

2026–NOW

HAV

Board Member and cofounder

Havfællesskabet

2024–NOW

SSE

Member of the Social and Symbiotic Evolution Group

2021–2023

GA

Volunteer at Grøn Agenda Sydhavn

which manages 18,200 m^2 on Sydhavnstippen in Copenhagen with the aim of increasing biodiversity

GRANTS & FUNDING

2026

DMF

Danish Mycological Society “Mushroom Grant”

7,125 DKK

2026

R

Rambøll Danmark A/S internal accelerator platform

50,000 DKK

2025

R

Rambøll Danmark A/S master's thesis pitch for building physics department head

50,000 DKK

2025

DMF

Danish Mycological Society “Mushroom Grant”, travel grant for Tropical Field Mycology Course

8,000 DKK

2024

DMF

Danish Mycological Society “Mushroom Grant” for personal microscope and microscopy supplies

7,000 DKK

2024

KU

UCPH Microbiology Cluster grant for interdisciplinary research projects

30,000 DKK

Research Experience

2026–now

Using molecular methods to reveal hidden mould growth in buildings

2026

Innovation project focused on fungal breeding techniques

2025

Growth experiments with uncultivated *Termitomyces* by replication of a 3D growth chamber

2024

Project in practice at Funga Farm, researching a fungal pathogen affecting yields of *Pleurotus ostreatus*

Presentations & Outreach

2026

Pitch-training session at the joint Biotech Research & Innovation Centre and Bioinformatics Institute seminar on fungal breeding techniques

2025

From 2D plates to 3D structures: Does termite-farmed Termitomyces need three dimensions to grow?

Carpentier, P.S., Kristian, B., Zhu, D., Schmidt, S., Rosendahl, S., Hipsley, C., and Poulsen, M. · Status report at the UCPH Microbiology Day

2025

From 2D plates to 3D structures: Does termite-farmed Termitomyces need three dimensions to grow?

Carpentier, P.S., Zhu, D., Schmidt, S., Rosendahl, S., Hipsley, C., and Poulsen, M. · Poster presentation at the Danish Microbiological Society yearly convention

2024

Fungus-farming and entomopathogenic termite stand at Fungi Festival and Culture Night
